

## How can I see a video on a PowerPoint Presentation?

Here are the instructions on detecting and watching a video on a PowerPoint presentation:

1. You Open the PowerPoint Presentation: Launch Microsoft PowerPoint and open the presentation that contains the video.
2. Navigate to the Slide: Locate the slide where the video is embedded.
3. Identify the Video: Look for the video on the slide. It will typically be represented by a video frame with playback controls.

### Introduction: Sustainability

**What is sustainability?**

Project N°: KA220 ADU 18986E3D

As you can see in the picture below, to open the video from the slide you need to press the Ctrl button on your keyboard and left click at the same time.

Sustainable development represents the way we must live in the present to secure a better future. It entails meeting our current needs without jeopardizing the ability of future generations to meet their own. The well-being of our societies and the health of our planet hinge on the pursuit of a more sustainable world.

By doing this, you will redirect to the YouTube page the video is originated from.

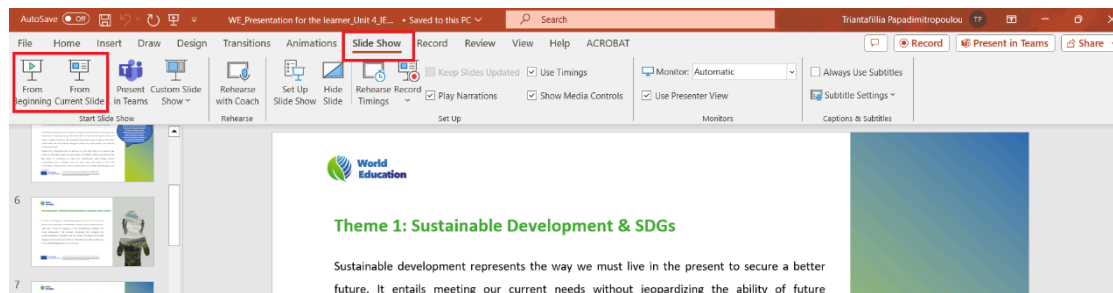

4. Play the Video: Click on the video to select it. Once selected, you might see playback controls. Click the "Play" button to start playing the video (As shown in the first picture).
5. Playback Controls: The playback controls (Play, Pause, Stop, etc.) may appear at the bottom of the video frame. Use these controls to manage the video playback, as shown in the picture below.

**BIC: Two minutes to understand sustainable development**

6. Preview the Slide Show: To view the video in the context of your presentation, go to the "Slide Show" tab and select "From Current Slide" or press F5 to start the presentation from the current slide. See picture below.

7. Adjust Volume and Settings: If needed, you can adjust the volume and other video settings. Click on the video, and you might find options in the ribbon under the "Playback" or "Format" tabs.

8. Watch the Video: As you progress through the presentation, the video will play when you reach the slide containing it.
