

How can I change the subtitles on a YouTube video?

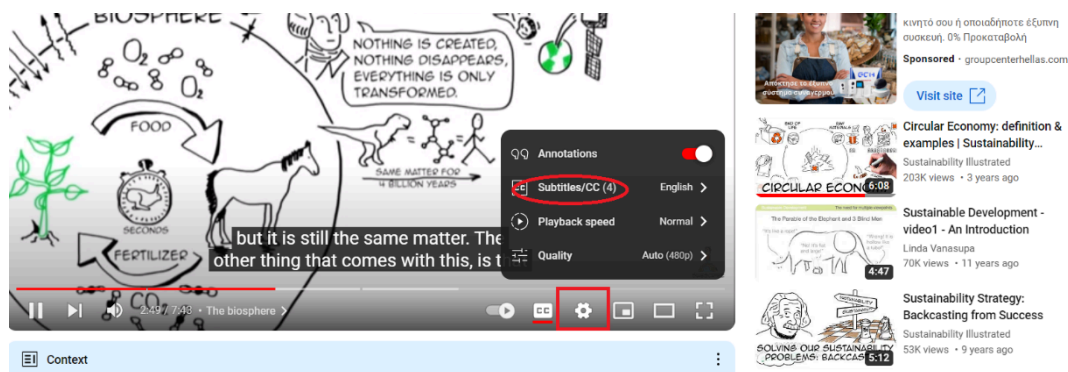

Changing subtitles on a YouTube video involves selecting or switching between the available subtitles or closed captions provided by the video uploader.

Here are the instructions for changing subtitles on a YouTube video:

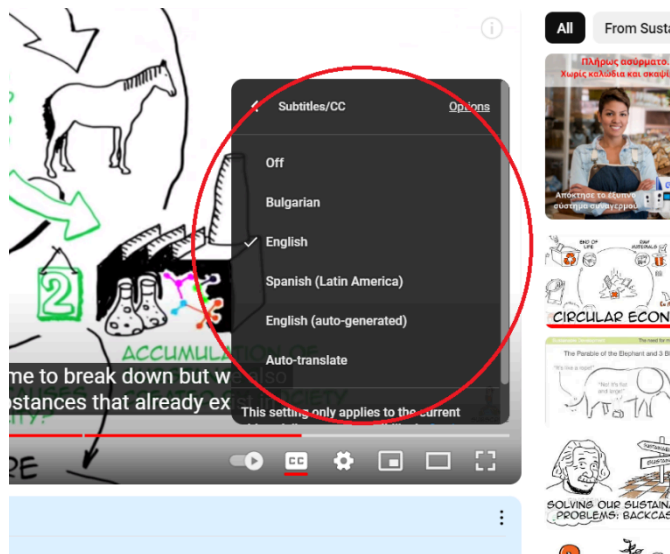

1. Find the Video: Locate the video for which you want to change the subtitles from the PowerPoint Presentation.
2. By clicking the link of the video, you will be redirected to the YouTube page.
3. Click on the Settings Icon: Below the video player, click on the "Settings" (gear) icon-like in the picture below. This is usually located next to the "CC" (Closed Captions) icon.

4. Select Subtitles/CC Options: Click on the "Subtitles/CC" option in the settings menu. If there are multiple subtitle tracks available, you'll see a list of languages.

5. Choose Desired Subtitle Language: Select the language or subtitle track you want to use from the list, like circled in the picture below.

6. Enable or Disable Subtitles: Once you've selected the desired subtitle track, you can choose to enable or disable subtitles by clicking the "CC" icon on the video player.
